

Task 2.5

1. From Exercise 2.3, I've added attributes to the user model including a picture and description. I've added the picture attribute for users to have a profile picture and a description to let them give a brief description of themselves. For the recipes model, I've added an author attribute for users to see who created the recipe.

2. Front End Inspirations

<https://www.bonappetit.com/>

I like the simplicity and elegance of this website's heading and overall look. I also like how they have their articles separated by category with one main article in focus giving the website an interesting appeal.

<https://www.budgetbytes.com/>

LATEST RECIPES

I like this website's unique logo and font, giving the overall webpage a cohesive look and purpose. I additionally like the latest recipes logo in the top corner which is a nice touch along with the color scheme.
